

M.Tech Bioprocess Technology

Vision

To establish a centre of excellence to provide demand driven, value based and quality technical education in the sector of bioprocess technology to make India a developed country through socio-economic transformation.

Mission

- ❖ To improve the bioprocessing and biotechnology applications in food, oleochemicals, antibiotics, nutraceuticals, biotherapeutics, natural products and pharmaceutical sectors etc. in terms of productivity, safety and functionality by employing fundamental applied sciences and engineering of bioprocess technology.**
- ❖ To produce trained personnel of highest standards for the benefit of the industry and society in the field of Biotechnology, Bioprocessing, Pharmaceutical Technology, Natural products and environmental protection etc.**
- ❖ To provide leadership qualities in areas of education, research, innovations and solutions in bioprocess technology, biotechnology, and bioengineering in order to direct overall activity towards economic and scientific growth of India.**
