

- **Vision:**

Empowering skills and knowledge about latest research in the field of Polymer and Surface Coating Technologies.

- **Mission:**

- . To offer world class Undergraduate, Postgraduate and Doctoral programme by providing quality education in Polymer and Surface Engineering.
- . To enable student to device new solutions to meet the needs of industry research segments of society with regard to Polymer and Surface engineering. To produce ethically strong & morally elevated human resource to serve mankind.
- . To undertake collaborative projects and consultancy for long term interaction with academia and industries.
