

Undergraduate Summer Research Internship

Department of Chemical Engineering, Institute of Chemical Technology, Mumbai

The Department of Chemical Engineering at the Institute of Chemical Technology, Mumbai (formerly UDCT, Mumbai) is a premier institute for educational and research excellence in India. We provide a nurturing environment and resources for research and learning that exist in only a handful of other institutions in the country.

We are able to support up to **25** undergraduate students from chemical engineering schools all over India to spend their summer with us and work on chemical engineering and science related research under the supervision of our faculty together with their research students. The degree of rigour demanded is high and the work done is often published in high-impact factor peer-reviewed international journals.

The internships are for a period of 6 weeks: typically starting in mid-May and continuing to end of June. The exact dates will be posted in mid-March. Any student from a UGC/AICTE recognized chemical engineering program in India after their **third year** is eligible to apply for an internship by sending an email to summertrainee@ictmumbai.edu.in with “**Summer Internship Application 2020**” in the **subject heading**, on or before **31st March, 2020**.

The email should contain (i) Filled Application Form (ii) the student's resume (*with class rank and CGPA/percentage*), (iii) a letter of recommendation from the Department Head, and (iv) a statement of less than 500 words about their motivation to pursue a summer research internship at ICT-Mumbai.

The final list of selected candidates will be intimated on or before 12th April, 2020.

Limited hostel accommodation may be available. Students will be responsible for all the expenses incurred during the internship. Limited fellowship support may be available.

Application Form
